The closest prior art references that relate to the claimed invention are Sato (EP'378), Yoshida (EP'739), JP'117, JP'176, Hosoe'811, Furukawa'043 and '513. The prior art references teach that it is known in the art to make and use articles made of metal powders dispersed in resin. However, the prior art does not teach or suggest the instant invention wherein the specific properties of such articles are claimed..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
